

Geo software shutting down

Posted by jennermack - 04 May 2018 09:15

Hi,

Has anyone ever seen the message "You may be a victim counterfeiting your system may become unstable"

I bought this card 1280 PCI about 2 yrs. ago from a guy I worked with who was in construction and demolition and had removed it from a job we both worked on, I saw him pull it. I have been running it with out a problem for 1 yr. and out of the blue my geo software shuts down and the only way to get it back up is manually. I did however buy a " genuine" copy of Geovision 8.4 software from E-Bay.

Any help will be appreciated.

I didn't find the right solution from the Internet.
