

Web Based GIS

Posted by jennermack - 02 Jun 2018 14:17

Hi,

1)What is available out there (off the shelf maybe?) for a web based GIS solution?2)Ball park figures i.e cost?3)What are the issues one need to be cautious of?Background: we have an area of approx 5km sq with utility data (from survey and engineering drawings), all to be compiled into SHP format for export. The client requires all data to be migrated into a web-based GIS. Anyone here worked on this type of things before & willing to share a link that I can look at?

Any help will be appreciated.

I didn't find the right solution from the Internet.
